## A Transformative Group Coaching Experience

“ A woman with a voice is by definition a strong woman. But the search to find that voice can be remarkably difficult. ”  
– Melinda Gates

This program is a response to the growing complexity and challenges surrounding women's advancement into senior leadership positions. The internal and external barriers that women have to navigate are coming at a great cost. Tackling this pervasive issue requires a deeper and more novel approach.

Through a unique facilitated process and program design, **Women's Leadership Circles** empower participants to surface unconscious biases, manifest new possibilities, and implement personalized strategies that produce meaningful and sustainable results. To accelerate this work, we use the Enneagram to determine each participant's core personality "type" and the strengths, patterns and areas of potential development. Among other content, together we explore the essential developmental topics of mindfulness, inner critic, creative expression, and wholehearted leadership.

The program's aim is to enable women to achieve more fulfilling leadership and work experiences. When this happens, organizations reap the rewards that come from these women's heightened contributions. The ultimate gain is a work environment that is inclusive, emotionally intelligent, and fosters well-being.
